

DEIGHTON FORMATIC COOKIE AND FOOD FORMING MACHINE DRUMS

The forming drums for the Formatic Range of machines are made to the precise customer requirements.

Whether the shape is a simple single circle or rectangle or a more complex shape such as a Christmas tree, the Formatic drums are made to exacting standards. Any shape can be reproduced with the only limiting factor being the physical size available on the drum (140mm length x 120mm width). The shape is scanned into the CAD system, the drawing created and approved by the customer and then the shape is transferred to the computer aided machining facility for the production of the drum form.

Forms can feature up to 4 different shapes. For example a Christmas drum could include a tree, a star, an angel and a snowman.
