

EconoBall/Meatball Making Machine

The new British made EconoBall Automatic Meat Ball Rolling Machine can turn economy cuts in to premium products.

Can produce over 6000 meatballs per hour.

The EconoBall Meat Ball Rolling Machine is used in conjunction with the Formatic R2200 so other shapes and sizes can be produced.

- ▶ Adjustable belt speed for interface with Formatic range
- ▶ Reliable, versatile and cost effective
- ▶ Suitable for the processing wide range of ball diameters
- ▶ Available in 200, 300, 400 and 600 widths
- ▶ Easy to operate, maintain and clean

Optional Extras

Automatic Wire Cleaning

Automatically cleans the scraper wire after every product is formed which saves the operator from having to try and clean it manually; Must be connected to a compressed air supply of at least 4 bar, 0.12 cubic metres per minute.

IMPORTANT the scraper shaft must be lubricated at the start of the production when using this accessory. Recommended for larger capacity production and when the formatic is used in production line applications.

Auto Papering

Automatically applies paper to underside of formed product, easy to operate, easy to load, easy to adjust and easy to clean. Can take up to 5 inch paper (127mm) as standard.

Hoppers

Different size Hoppers from 20L TO 200L FDA & USDA approved material, 3mm thick solid 304 food grade Stainless Steel, easy to remove easy to clean.

Extended Conveyors

Extended Conveyors also available.
